

Barrel Clamp

Barrel Clamps - A Barrel Clamp is really a hydraulic or mechanical accessory for a forklift. It can be utilized in order to compress the item you want to transfer utilizing the forklift and is typically used for handling barrels, kegs and paper rolls. A few types of barrel clamp attachments likewise have a rotate function. For example, the revolving function enables the person operating the forklift to be able to put in a vertically stored paper inside the horizontal intake of a printing press.
