

Electrical Parts for Forklifts

Forklift Electrical Parts - Lift trucks may be specifically labeled to be used in hazardous places. A labeled lift truck indicates the design has met the lowest requirements of ANSI/UL 558 used for engine powered trucks or ANSI/UL 583 intended for electric forklifts for the type of label put.

The use for labels utilized for lift lift trucks may be found in National Fire Protection Association NFPA 505 - Powered Industrial trucks including: Areas or Use, Maintenance and Operation, and Type Designations. Ask your local insurance provider and Fire Marshall for further information regarding the approved uses of industrial powered forklifts in your application.

If the particular forklift meets the outlined criteria, labels could be attached. A labeled lift truck would show the type of designation located on the nameplate and would have a correctly corresponding label put.
